BURNPLAN

As October dawns, we light the flame,
Starting a journey where luck and scarcity claim.
On the 6th, 10% of Fu takes flight, into the ether,
out of sight.

November follows with another 10,
Fueling the fire, again and again.
In December's chill, 15% will blaze,
Midway through our burn-filled days.

January comes with 10% more,
As the new year rings, we even the score.
February sees 5% take leave,
March with 3%, a goal we achieve.

April arrives, the final 2% to burn,
The FUmmunity watches as the tokens turn,
To ash and dust, making the rest more rare,
Fu's journey continues, with luck in the air.
